Short Course in

SKIN CLASSIFICATION

For Somatologists

THIS SHORT COURSE IS TAILORED FOR:

- Experienced Therapists
- Aesthetic Nurses
- Skincare Brand Business Developers
- Skincare Brand Trainers
- Any industry professionals that wish to improve their knowledge and skills on skin to an advanced level.

COURSE OUTCOME

To understand functioning of the skin on a cellular level to prescribe suitable and safe procedures and products.

To equip the professional to offer in depth and accurate skin consultations to be a chargeable service.

COURSE CONTENT

- Advanced Skin Anatomy and Physiology relating to facial skin.
- Focus on cellular function in each skin layer and how dysfunction in these layers visibly appear on the skin.
- Cause, manifestation and treatment of most skin conditions treated in clinics daily.
- Effect of lifestyle, disease and gut health on the skin.
- Basic knowledge on cosmetic biochemistry and selecting most suitable ingredients for various skin conditions.

Training is brand agnostic and provides anyone treating skin, the tools and knowledge to customise product and protocol prescriptions relevant to any brand.
